

GBI Capacity Services

Datasheet

www.gbiinc.com

Who We Are

GBI is a global cloud, connectivity and content enabler that owns and operates a smart, fully managed service network. Our multilayer terrestrial and subsea cable meshed network bridges the East to the West through the Middle East, empowers businesses, connects societies and contributes to the region's transformation towards knowledge-based economies.

Robust Backbone Connectivity

Fast, Private, Direct

Clear channel, committed information rates with no competing traffic on your GBI capacity service from 100ms to 140ms to European POPs

Carrier Neutral Backbone

Top of the line wholesale transmission network across Asia, Middle East and Europe.

Fully Protected

Our fully protected MPLS connectivity comes with a 99.99% SLA

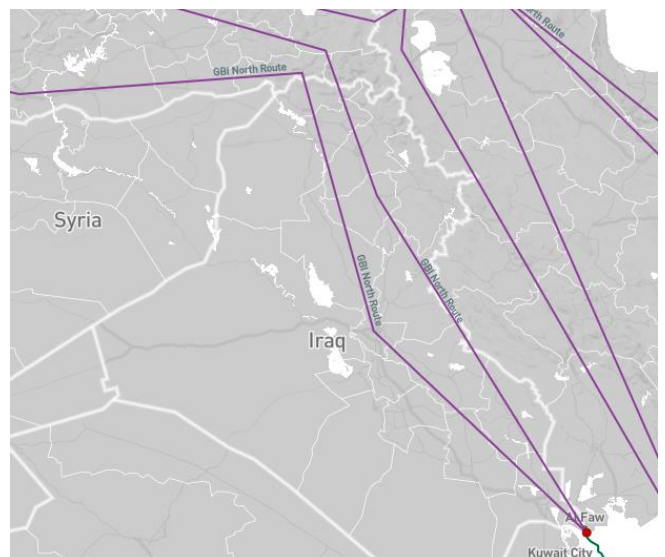

Ultimate Flexibility

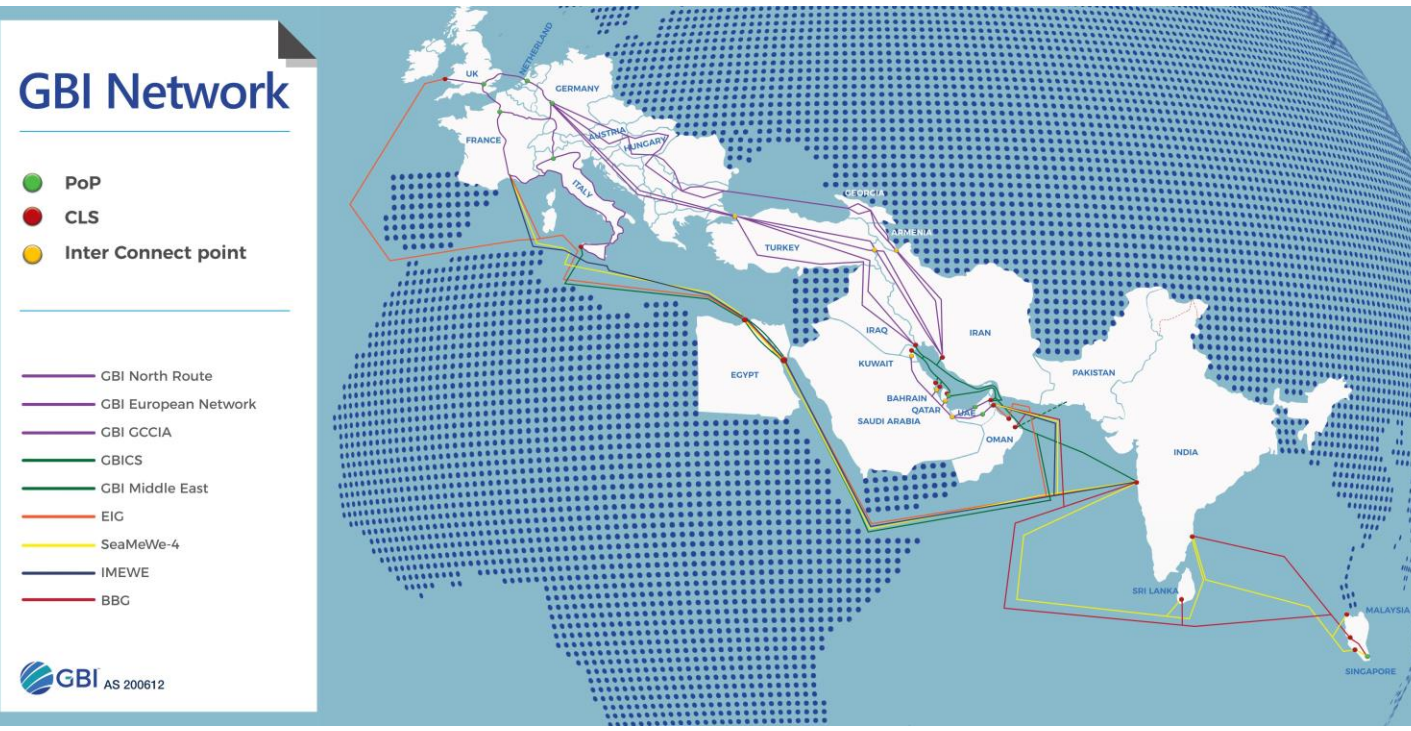

Full range of IPLC, SDH, EoSDH (EPL) and DWDM capacity where, when and in the quantity you need.

South Route Bypassing Suez

Low Latency North Route via Iraq

Protection Options

Fully Protected

The traditional form of protection. Automatic switchover to a fully redundant circuit.

Restorable

GBI will restore the circuit within a certain time of the service disruption to backup capacity

Restorable IP Transit

Aimed at carriers in the Middle East, GBI will provide a full IP transit service to replace any service failure to separate up streams

GBI Smart Network Features

STM1 to STM64, 100MB to 100GB EPL and IPLC services

10G and 100G wavelength services

Access to the main DCs in the GCC

Leverage different routes to reach the GCC from Europe, India and Singapore
