## Who We Are

GBI is a global cloud, connectivity and content enabler that owns and operates a smart, fully managed service network. Our multilayer terrestrial and subsea cable meshed network bridges the East to the West through the Middle East, empowers businesses, connects societies and contributes to the region's transformation towards knowledge-based economies.

**GBI offers secure, direct connectivity to the leading cloud service providers such as: AWS, Azure, Google, Oracle, IBM, and SAP**

Connecting to a cloud service provider is integral to most businesses in their digital transformation journey. However, using the global Internet to connect to the cloud has many challenges, including lack of security, unreliable latency, and inconsistent routing.

GBI provides end-to-end management of cloud connectivity services, optimising the customer's cloud experience.

### **Cost-effective and Reliable**

Transport-agnostic last mile connectivity by using broadband, DIA, LTE, and/or local MPLS connection.

### **Hybrid Cloud Solution**

Seamlessly connect and control your infrastructure and data in public and private cloud environments.

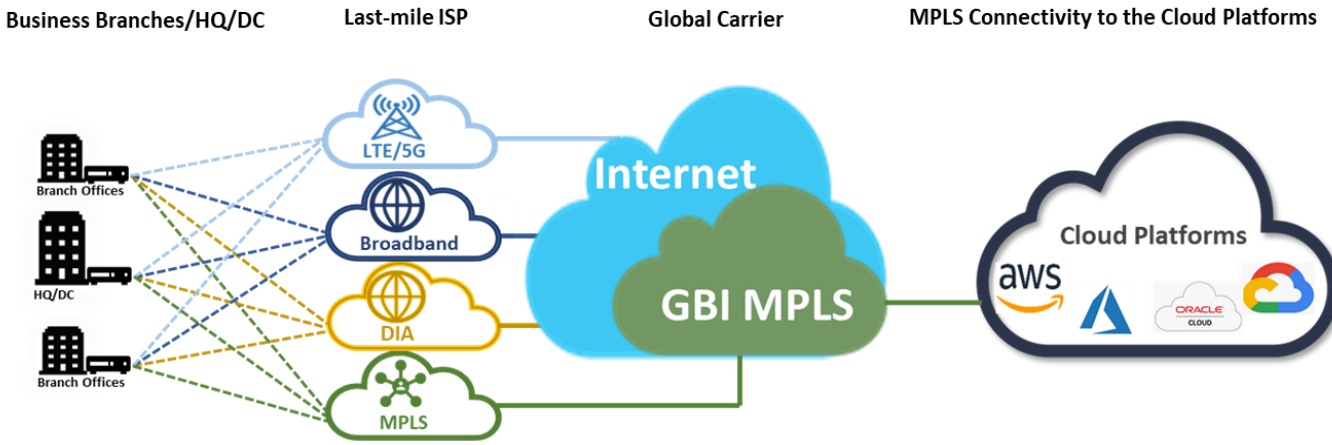

### **Scalable, Secure, Seamless**

A secure, resilient connection to the cloud designed specifically to meet your growing business needs.

### **Peace of Mind**

GBI connectivity to clouds is backed by redundant network, strong SLAs for availability and Round-Trip Delays.

GBI Cloud Connect services secure connectivity to the cloud platforms in Europe and GCC by combining global MPLS connectivity with local MPLS or any type of local internet access on the last mile.

The Global MPLS connectivity leverages the GBI Global MPLS VPN services that provide a fully protected premium route to Europe and GCC, resulting in an unbeatable low latency private access to the clouds. The GBI cross-region and multi-country IP peering in the GCC and globally assures the use of any type of internet access for the last mile, thus the connectivity of any customer locations in the GCC via any technology.

## Solution Features and Benefits

	Features	Benefits
Connectivity Speed	<ul style="list-style-type: none"> <li>Direct connectivity to the leading cloud service providers</li> <li>Optimized routing via GBI's Global MPLS POPs</li> <li>Lowest latency route to Europe</li> </ul>	<ul style="list-style-type: none"> <li>Consistently fast speeds into Europe</li> <li>Securely connects your Middle East office to the cloud providers</li> <li>Symmetric access speed up to 1Gbps</li> </ul>
SLA	<ul style="list-style-type: none"> <li>Leading availability and latency guaranteed</li> </ul>	<ul style="list-style-type: none"> <li>Improved service continuity</li> <li>Minimize frustrating downtime through stringent performance metrics</li> </ul>
Service	<ul style="list-style-type: none"> <li>24/7 Global NOC</li> <li>End-to-end service management</li> </ul>	<ul style="list-style-type: none"> <li>Receive relevant, timely information</li> <li>Access to round-the-clock control and management of your service</li> </ul>
Technology	<ul style="list-style-type: none"> <li>GBI Global MPLS backbone</li> <li>GBI Managed SD-WAN services</li> <li>Enhanced end-to-end secure connectivity</li> <li>Transport-agnostic for the last mile</li> </ul>	<ul style="list-style-type: none"> <li>Access cloud applications directly from your WAN</li> <li>High security of company sensitive information</li> <li>Inexpensive Ethernet interfaces</li> </ul>
Service Scalability	<ul style="list-style-type: none"> <li>Support any network topology seamlessly</li> <li>Quick and unlimited deployment of new branches as well as change or remove existing branches</li> </ul>	<ul style="list-style-type: none"> <li>Business agility</li> <li>Grow the service as your business grows</li> </ul>

Ensures an optimized end-user experience on a dedicated Cloud Connect platform with the best available connection to public cloud providers in Europe.

## GBI Cloud Connect Service Options

GBI Provides	Cloud Connect MPLS	Cloud Connect SD-WAN
A secure, scalable and affordable managed connectivity from your on-premise infrastructure to a cloud platform	✓	✓
Stringent SLAs for both Latency and Availability	✓	✓
Partnerships with the major cloud service providers across the Middle East and Europe	✓	✓
Integrating the cost-effective internet last mile and connect to the cloud via global MPLS	No	✓

## Technical Specifications and Latency

Access Speeds	10Mbps to 1 Gbps
Interfaces	Ethernet (FE/GE) RJ45
Availability	99.9%
Latency to Europe (Amsterdam) Premium Route – North	98ms -110ms
Latency to India (Mumbai)	40ms
Latency to Gulf	10-20ms
Latency to Asia (Singapore)	90ms
